

A power tool for a power language

Key Facts

CLion is a smart cross-platform IDE for developing in C and C++. Built on top of IntelliJ Platform, it includes a lot of intelligent features that boost your productivity.

Key Benefits

Develop in C and C++ smarter and faster than ever before, by relying on JetBrains expertise in code quality, efficient code navigation, intelligent code completion, on-the-fly code analysis with quick-fix suggestions, broad code generation options, and superior code refactorings, combined with support for CMake build system.

Key Features

- Support for C and C++ (including C++11, libc++ and Boost)
- Support for Python, Swift, JavaScript, XML, HTML and CSS
- Cross-platform: available on 64-bit Linux, OS X, and 64-bit Windows
- CMake support (including automatic handling of CMake changes and CMakeCache editor)
- Finest coding assistance with multiple cursors, smart completion and one-click navigation
- Safe automated code refactorings
- Code analysis to keep a watchful eye on the quality of your code, with quick-fixes to resolve problems in-place
- Integrated debugger with 'evaluate expressions' feature, STL renderers, and more
- Integrates with popular version control systems including Subversion, Git, GitHub, Mercurial, CVS, Perforce (via plugin), and TFS
- Built-in terminal and Vim-emulation mode (via plugin)
- Google Test support (including built-in test runner and code generation in tests)
- Automatic imports for STL symbols

System Requirements

- Linux 64-bit, Windows 7.0 x64, 8.0 x64, 10.0 x64 or OS X 10.9+
- 2 GB of free RAM
- GNOME or KDE desktop for Linux
- 1024x768 minimum screen resolution
