

PhpStorm

Lightning-smart PHP IDE

Key Benefits

PhpStorm features an editor that actually 'gets' your code and deeply understands its structure, supporting all the latest PHP versions for modern and legacy projects. It provides the best code autocompletion, refactorings, on-the-fly error prevention, supports language mixtures and more. Hundreds of inspections take care of verifying your code, analyzing the whole project. PHPDoc support, code (re)arranger, code formatter with code style configuration and other features help you write neat code that's easy to support. All the cutting-edge web development technologies are supported including ECMAScript 6, TypeScript, Node.js, AngularJS, React, Meteor, vue.js, and of course JavaScript. PhpStorm includes all the functionality of WebStorm (HTML/CSS Editor, JavaScript Editor) and adds full-fledged support for PHP and Databases/SQL.
