# Lightning-smart PHP IDE

## Key Facts

JetBrains PhpStorm is a professional and intelligent PHP IDE providing developers a mix of powerful intelligent tools, useful everyday actions and best practices for PHP development, all geared toward enhancing developer productivity.

## Key Benefits

PhpStorm features an editor that actually 'gets' your code and deeply understands its structure, supporting all the latest PHP versions for modern and legacy projects. It provides the best code autocompletion, refactorings, on-the-fly error prevention, supports language mixtures and more.

Hundreds of inspections take care of verifying your code, analyzing the whole project. PHPDoc support, code (re)arranger, code formatter with code style configuration and other features help you write neat code that's easy to support.

All the cutting-edge web development technologies are supported including HTML5, CSS, Sass, SCSS, Less, CoffeeScript, TypeScript, Dart, ECMAScript Harmony, Jade templates, Zen Coding, Emmet, AngularJS, and of course JavaScript.

PhpStorm includes all the functionality of WebStorm (HTML/CSS Editor, JavaScript Editor) and adds full-fledged support for PHP and Databases/SQL.
