ACCESS FROM ANYWHERE

For more details about Space and its features, please visit jetbrains.space

“With Space, all the data a team needs to do its work is stored in one place, while software development tools are integrated with communication and identity support.”

Mike Butcher,
TechCrunch

Organize teams

Everything your company needs to ensure open work and transparent collaboration: the teams, locations, member profiles, roles and permissions, calendars, meetings, vacations, and blogs — all in one place.

Communicate in Chats

Your personal inbox — get personalized notifications, reply and react using chats, perform code reviews, track issues, and share documents.

Plan work

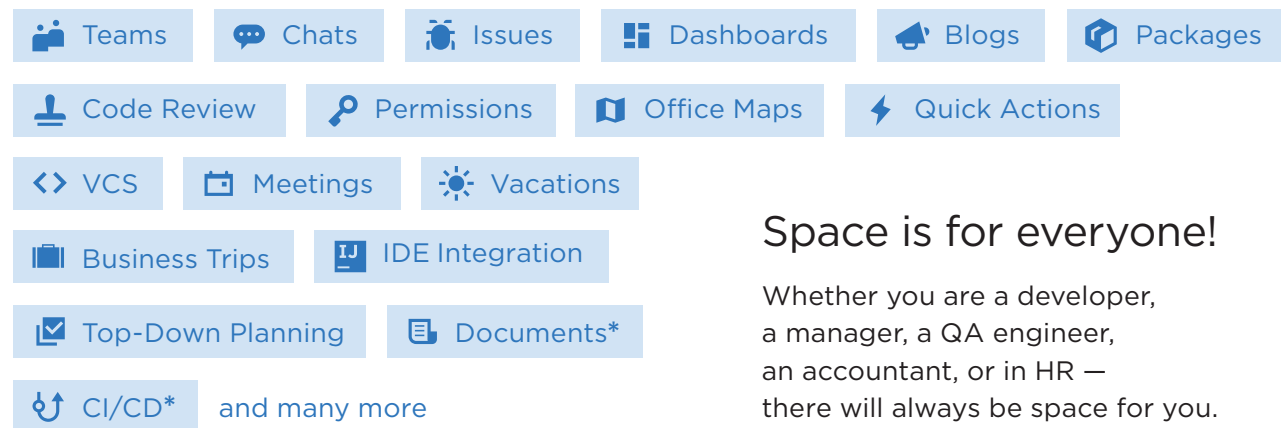

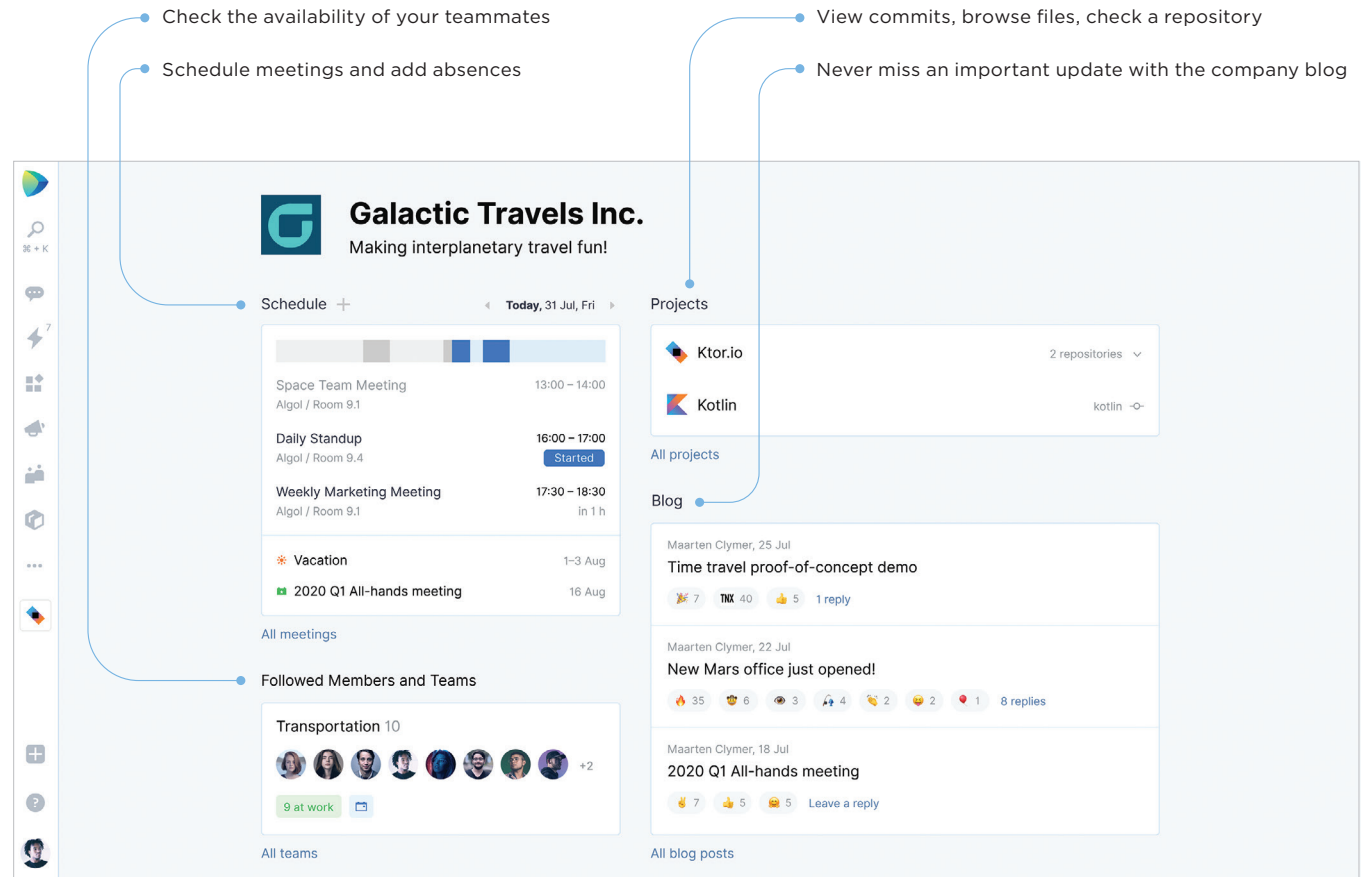

Plan, manage, and work on your projects as a team, optimizing the whole workflow and collaboration process.

Build and Deliver

Commit code and explore changes. Review code. Create merge requests. Automate your workflows and CI/CD jobs. Store and manage package repositories. Connect JetBrains IDEs to Space.

Build upon an extensible platform

Customize and extend Space to meet the unique needs of your organization.

Space is for everyone!

Whether you are a developer, a manager, a QA engineer, an accountant, or in HR — there will always be space for you.
