# YouTrack

by **JETBRAINS**

Comparison

YouTrack is a powerful project management solution by JetBrains that is designed to adapt to your business processes and serve as a universal platform for managing projects. With YouTrack, you can track daily tasks, collaborate with your team, streamline processes using services powered by JetBrains AI, maintain a knowledge base, work with Agile boards, perform time tracking, manage projects with Gantt charts, create reports and dashboards, support external customers or maintain a service desk for internal users with helpdesk projects, and extend YouTrack's functionality with apps.

Key Benefits

How YouTrack Compares With Other Project Management Solutions

Accuracy of Comparison

Integration with JetBrains Tools

Sales Contacts

Key benefits

An all-in-one project management solution:

- Project management and task tracking.
- Built-in internal or public Knowledge Base.
- Real-time Agile boards.
- Time tracking and detailed Timesheet reports.
- Interactive Gantt charts for managing the entire project timeline.
- Multiple reports and shareable Dashboards.
- Helpdesk projects to support external customers or maintain a service desk for internal users.
- Automatic task creation, suggestions for comments and replies, writing support, content summaries, and other services powered by JetBrains AI.
- Apps for customization, functionality extension, business process automation, and integration with other tools and internal systems.

Task management for all your teams:

- Workspace and task views can be configured by switching between list and table formats and adjusting the level of detail. Fields are editable directly in the issue view, with previews to reduce context switching. Sorting and grouping by multiple fields supports efficient task management. Tasks can be found via free-text search, dynamic filters with suggestions, or advanced query mode. Saved searches can be reused and shared for consistent access to relevant data.
- Commands to quickly execute batch operations.
- Autosaved issue drafts.
- Editor with annotations for attached images.
- Interactive embedded Figma previews, Miro boards, and Google Workspace content.

Customization:

- Powerful scripted process automation with a code-free visual editor.
- Customizable task layouts and attributes.
- Customized notifications and built-in notification center.

Integrations with VCS and other tools

Mobile app for Android and iOS

All features are available on free and paid plans without restrictions

---

Choice of Cloud or Server

Free, fully functional version for up to 10 users and 3 support agents

---

Wizard for importing projects, tasks, and users from popular tools

---

Full technical support for free and paid subscriptions

YouTrack is the most recommended tool according to the 2019 Issue Tracking Tools Review. **Check out** the official report.

How YouTrack Compares With Other Project Management Solutions

This table compares JetBrains YouTrack, Atlassian Jira Software, and Trello.

YouTrack and Jira Software are compared in their "out of the box" state, with no add-ons or extensions installed except where otherwise stated. Trello is compared with the free Butler add-on installed.

All of these products are being actively developed and their functionality changes on a regular basis. This comparison is valid for the latest versions of each product as of February 2025.

Custom fields			
Fields	All fields, including predefined fields, are customizable. Administrators can add unlimited custom fields.	Most fields are customizable. Administrators can add unlimited custom fields..	A limited number of custom fields is available with paid plans.
Conditional custom fields	✓	✓	×
Apps			
	Apps in YouTrack enable the customization and extension of the platform's functionality. Apps help teams customize YouTrack to fit their specific needs, either by extending built-in features like project management, reporting, and automation or by adding new features, tools, and integrations that aren't available out of the box. Users can create their own apps, work with a YouTrack consulting partner, or install available apps from JetBrains Marketplace.	Jira allows the integration of apps and plugins to enhance its functionality. Users can develop custom plugins, use third-party apps from the Atlassian Marketplace, or implement solutions provided by Atlassian partners.	Power-Ups for Trello are integrations that enhance the functionality of Trello boards by adding features and tools tailored to specific needs. They enable users to customize their Trello experience, allowing for improved project management, collaboration, and productivity.
Integrations			

Functionality	YouTrack	Jira	Trello
	YouTrack provides extensive integrations with version control systems and JetBrains products, including CI/CD tools and IDEs. It features out-of-the-box connections to communication platforms and customer support tools, along with test management tool integrations. Users can enhance their experience through browser extensions and app integrations. The built-in import wizard facilitates the migration of projects, users, and groups from other solutions. YouTrack also makes it possible to add images, videos, and documents, and it offers plugins for time tracking, mailbox, and identity provider integrations.	Jira has a marketplace of add-ons that provide integration with third-party tools and comes with native integration for Atlassian products (Confluence, Bamboo, etc.).	Plugins are available for integration with other products like Slack, Google, Jira etc.
Permissions management			
	User access in YouTrack is defined on a per-project basis by the roles that are assigned to the user. A role is a set of permissions that allow users to perform particular operations in YouTrack. Permissions are only granted by assigning roles, not directly.	Permissions are managed per project. There are groups and roles, and permissions can be granted to users directly.	Permissions can be granted to users directly.

Comparison Accuracy

We've tried to make this comparison as comprehensive and objective as possible. If you discover any inaccuracies in the table above, please contact us at **sales@jetbrains.com** and we'll update the table as soon as we can.

Integration with JetBrains Tools

YouTrack is a part of the JetBrains Team Tools stack, which also includes TeamCity, a continuous integration and continuous delivery tool. Team Tools are integrated via Hub, a permissions and user management tool that provides single sign-on for all Team Tools products.

To learn more about how JetBrains team tools work together, please check our website at **jetbrains.com/hub**.
