YouTrack

Company-wide project management

Collaborate as a company

Customize YouTrack to fit your processes, and leave your teams free to concentrate on delivering great products. Create projects that match the way your different departments work, and bring them all together seamlessly.

Migrate easily

Painlessly import projects from Jira and other issue trackers, as well as your entire Confluence knowledge base, with YouTrack's user-friendly wizard.

Not just for agile teams

- Plan, manage, and track everything from personal backlogs to company-wide project portfolios.
- Make task management easy for non-development teams with the streamlined YouTrack Lite interface.
- Collaborate effectively within and between teams with notifications in YouTrack, via email, or in the mobile app.
- Configure Agile Boards to support the way you work.
- Keep all team and project documentation in Knowledge Base.
- Deliver on schedule and on budget with advanced time tracking features.
- Track progress and monitor project health with powerful dashboards and reports.

Continuous integration and deployment

Ship new features faster and with fewer bugs

- Automate build-test-deploy pipelines of any complexity and scale
- Configure CI/CD pipelines via a full-featured web UI, or create them programmatically using Kotlin
- Get notifications about build results in real time, in the browser, messengers, or your IDE
- See the history of every single test, analyze the trends, and track how your code quality changes over time

Code reviews and more

Improve your code, project, and process

- Automate your code review workflow and leverage smart suggestions.
- Review changes from your IDE, or use web UI.
- Discover design flaws and project-wide risks using project analytics.
- Onboard new team members faster and share knowledge.

• Scale it.
